

SELF-LUBE ROLLER CHAIN (SLR)

Donghua SLR chains have been designed to incorporate special oil impregnated sintered bushings, extended beyond the inner plates to prevent dirt ingress; giving these chains their self-lubricating characteristics.

SELF-LUBE ROLLER CHAIN (SLR)

Nickel plated throughout to prevent corrosion and with chemically plated and tempered pins, offering improved wear resistance and added protection in the bearing areas, Donghua SLR Chains can be used in higher speed drives to provide longer service life.

Ideal where chain lubrication is difficult or undesirable, due to the risk of conveyed product contamination.

Available in British & American Standards.

Features at a Glance:

- Oil impregnated sintered bushings - able to withstand temperatures ranging from -40°C to +160°C
- **Maintenance free - dramatically increases chain life over standard roller chains when not lubricated**
- Reduces maintenance costs
- **Clean handling - prevents conveyed product contamination**
- Nickel plated throughout
- **High wear life**
- Chemical nickel plated pins
- **Extended bushings - prevent ingress of dirt and foreign objects**
- Ultimate strengths exceed DIN minimums
- **Fully compliant with DIN:8187 & DIN:8188**
- Extended pitch versions available
- **Available with K, M bespoke or extended pin attachments**
- Ideal for all chain or light conveyor chain applications

Donghua Offer:

UK based distribution centre with 7000 sq ft of warehousing capacity
Huge local stock holding
Extensive product range
Regional stockists
Wide range of materials & alloys
Next day delivery
Chain cutting services
Bespoke chain supply
Large database of original equipment part numbers available
ISO 9001 accreditation
API endorsed production

Huge Local Stock Holding & Bespoke Chain supply is available from Donghua Limited's UK Distribution Centre
