We only have one standard. The Best.

## At a Glance:

- Hard chrome surface coated pin
- 1100 HV surface hardness
- Increased wear life in arduous & abrasive conditions
- High wear resistance
- Hard working chain
- Highly durable
- Available direct in the UK ex-stock
- Part of the Donghua Solutions Range

## Choose from a complete range of Links:

E: Conn Link with Open Spring Clip

S: Conn Link with Cotter Pin

L: Off-set Link

C: Double Off-set Link

A: Rivet Link

B: Inner Link

Donghua's CP Chain is designed with a chromized pin to deliver high wear resistance. Combined with highly sophisticated lubricants, this provides unique performance in arduous & abrasive conditions.

Adding a chrome surface coating to the pins results in super-hard pins which help to extend the wear life of the chain over that of standard Roller Chain.

With a 1100 HV surface hardness, our Chromized Pin Chain has an increased resistance to wear, 30% higher than standard case hardened pins, making it ideal for use in dusty, gritty and high wear applications such as brick-works, mining & the timber industry.

Donghua's Chromized Pin Chain is sold through our UK-wide supplier network and is available in 08B to 20B, ANSI 40 to 80 and in simplex and duplex.
