

# Cut to Length Chain Available

Fast, in-house chain cutting service for Leaf Chain and Roller Chain

[donghua.co.uk](http://donghua.co.uk)

We only have one standard. The Best.

## UK Workshop:

Our Midlands based Chain Workshop specifically delivers bespoke in-house built Attachment Chain and Special Chain. Our technical capabilities include:

- Chain length measuring machine
- Pre-loading machine
- Matching machine
- Presses for cutting large pitch chain
- Automatic chain cutting machine
- Pneumatic press riveter for attachment or bespoke chain
- Hot dip lubrication facilities
- Tub grinder for accurate surface grinding of chain components and sprockets

## At a Glance:

- Only machine of its kind in the UK
- Designed by Donghua
- Very quick cutting speeds
- Automated machine process
- Cuts Leaf Chain and Roller Chain
- Cuts simplex, duplex and triplex
- Cost-effective cut to length chain
- Carriage paid on all orders of in-house cut chain (UK mainland only)

**Donghua has installed a new automatic chain cutting machine in our technical workshop in the West Midlands, providing a new in-house Chain Cutting service for our Leaf Chain and Roller Chain.**

The new machine is programmed with the type and pitch of chain, whether it's simplex, duplex or triplex, and the length required. The machine feeds the tensioned chain into a chamber where it is automatically cut. The process is then repeated for the desired quantity of chain. After each cut, the chain is automatically dispensed ready for inspection and packaging.

We can automatically cut Leaf Chains from 1/2" pitch to 1 1/4" pitch in AL, BL, LL, FLC series; and cut Roller Chains from 1/4" pitch to 1 1/4" pitch in simplex, duplex and triplex!
