

Drytec Chain

Maintenance-Free
Stainless Steel Chain

donghua.co.uk

We only have one standard. The Best.

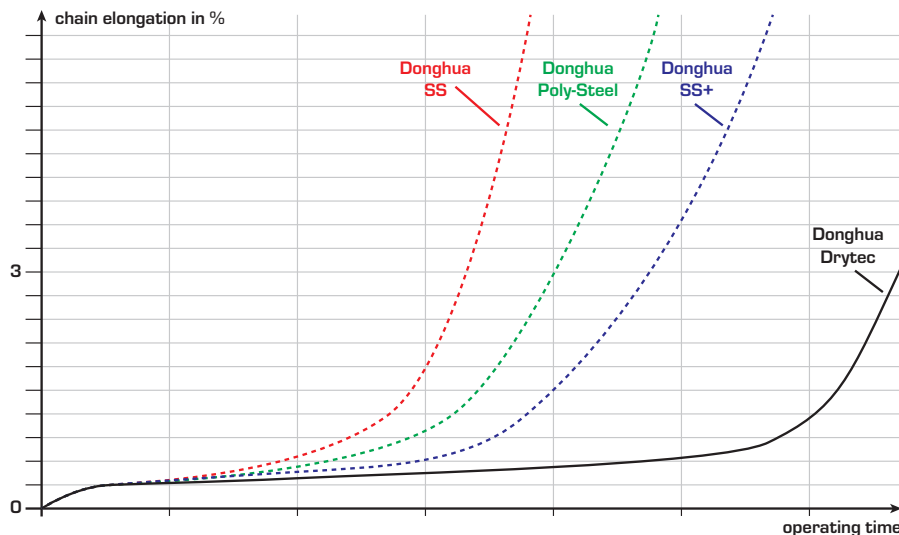

Drytec Chain at a Glance:

- Maintenance-free
- Corrosion resistance
- Stainless Steel S304
- Polymer bearings
- Durable
- Wear-resistant
- High fatigue strength
- High tensile strength
- Cut to length
- Pre-stretched and matched
- Common chains available ex-stock
- Attachments and extended pins available on request
- Matching and tagging per pair

Quality Positioning

Donghua's Drytec Chain has been designed to provide a maintenance-free Stainless Steel chain solution reducing maintenance costs and downtime.

Designed with engineering plastic sleeves (which has improved mechanical and thermal properties over standard plastic), our Drytec chain is the ideal choice for ease of maintenance, wear-resistance and reliability.

Our Drytec Chain is ideal for use in food processing and healthcare facilities and also in wash down or wet environments where corrosion protection is paramount and chain lubrication is difficult or undesirable. It can operate in temperatures of -40°C to +60°C.

Available in 08B-1 to 16B-1, 08B-2 to 16B-2 and ANSI 50-1. Breaking load, length tolerance and material analysis certificates available on request.
