Sprockets

We only have one standard. The Best.

POLYMER CHAIN

Manufactured using engineering plastic, Donghua's Polymer chain is designed to prevent the ingress of foreign matter and reduce the risk of contamination during processing, making it an ideal conveyor chain for the Food & Drink and Healthcare industries.

This lube-free, polymer chain is food safe, offers extended wear-life and, due to its corrosion resistance, can be washed down during scheduled maintenance of machinery. Designed with less moving parts and with no roller to wear down, Donghua's Polymer chain reduces the need for additional maintenance downtime making it a cost effective solution.

Lube-free, food safe polymer chain, offering extended wear-life and corrosion resistance which allows wash down during scheduled maintenance.

And, with a higher breaking load than many of the leading brands, Donghua's Polymer chain is the chain of choice.

Available in ½" O8B, 5/8" 10B and ¾" 12B.

At a Glance:

- Higher breaking load compared to other leading brands
- FoodSafe product
- Reduces maintenance costs
- Extended wear-life as less moving parts
- Lubrication free
- Designed to prevent ingress of foreign matter
- Lightweight
- Corrosion resistant

UK | Workshop Facilities

A comprehensive range of services is available at our Midlands based workshop including: Pre-loading, Measuring & Matching, Chain assembly, Hot-dip lubrication and Bespoke tooling & finishing, for details call: **01902 866200**
