- Ultimate tensile strengths exceed DIN minimum standards
- Chain length accuracy
- Flexible chain twist angle for smooth performance
- High wear life
- Pins firmly riveted on both ends for enhanced integrity
- Available with attachments
- Compatible with standard Donghua sprockets

Donghua's Special Side Bow Chains are specialised roller chain designed with a flexible chain joint and rollers that rotate to accommodate the contour of curved conveyor lines (Power Bends) without compromising performance or reliability.

Unlike standard conveyor chain, Special Side Bow chains are designed to navigate both straight and curved paths in a continuous run.

Overhead conveyor chain and extended pins used in automatic or semi-automatic conveyor systems are also available.

Common builds available ex-stock.

Available in British and American standards.
